

Career Opportunity for Specialist in Nuclear Medicine

Linköping, Sweden

The University Hospital in Linköping, located in the south of Sweden is looking for a specialist in nuclear medicine

Main responsibilities and expectations

- As a specialist in nuclear medicine (PET/CT), you will work with advanced diagnostic imaging, including PET/CT and SPECT-CT. Your tasks will include supervising examinations, interpreting results, and writing medical reports. The examinations cover areas such as skeletal scintigraphy, thyroid scintigraphy, brain imaging, and general oncology, as well as cardiac imaging using SPECT-CT and PET/CT.
- You will play an important role in the development of the PET/CT unit, which has recently expanded to include cardiac PET/CT. The role also involves close collaboration with multidisciplinary teams, including radiology, medical physics, and research departments.
- You will be part of a university hospital environment with strong involvement in research, development of new diagnostic methods, and collaboration with the university. Teaching and supervision of medical students and resident doctors are also part of the role.

What's expected of you

- To have a specialist title in nuclear medicine, including PET/CT.
- To have clinical experience with PET/CT and SPECT-CT, including interpretation and reporting.
- To have experience with whole-body CT interpretation.
- To show strong interest in research, preferably with publications in nuclear medicine or PET/CT.
- To have an interest in teaching and supervising students and residents.
- To be a team player with strong communication skills.
- Ability to complete the intensive Swedish language course (MediCarrera program) is required.

Salary and conditions

- The gross monthly salary is between 80,000–85,000 SEK (approximately 7,000–7,500 EUR), depending on experience.
- No on-call duties.
- Start date: As soon as possible after completing the Swedish language training.

MEDICARRERA OFFERS

- A free visit to see the place where you will live and work and meet future colleagues.
- A free online preparing and intensive language course.
- A free intensive online language course for partners.
- 2 weeks of face-to-face classes in Spain, with accommodation and free flight tickets for the doctors.
- A scholarship for the intensive language course of 1200€ monthly.

OUR SUPPORT

- We find you a place to live and help to register your children in a school or kindergarten.
- We help you with practical matters, such as social security number, medical card, bank accounts, etc.
- We help your spouse with sources for job search.
- We contact the moving company and arrange the moving trip.
- You receive an information package with practical details and a contact person to call in case of any problems.

MediCarrera

ABOUT THE HOSPITAL

Region Östergötland works to promote good health, high-quality healthcare, and sustainable regional development. Their main responsibilities include public healthcare, dental care, public transport, and regional growth. They are one of the largest employers in the region, with thousands of employees across a wide range of professions.

Linköping University Hospital is the largest hospital in the region and a leading university hospital in Sweden. It provides highly specialized care, combines clinical work with research and education, and serves as a referral center for the southeast healthcare region.

The hospital is known for its strong focus on innovation, collaboration, and continuous development of medical methods and treatments.

About the department:

The Department of Clinical Physiology at Linköping University Hospital is part of the Heart Centre, working closely with cardiology, thoracic surgery, and thoracic anesthesia. The department is organized into specialized teams, including nuclear medicine (PET/CT), cardiac MRI, echocardiography, vascular ultrasound, lung diagnostics, and interventional procedures.

The nuclear medicine and PET/CT team collaborates closely with the radiology department and medical radiation physics. The clinic is equipped with several SPECT-CT systems and works in cooperation with PET/CT systems, including a newly installed scanner that expands capacity in cardiac, neurological, and inflammatory diagnostics.

The department has a strong academic profile, with close collaboration with the university in research, development of new diagnostic methods, and work with radiopharmaceuticals. You will work in a multidisciplinary environment alongside physicians, biomedical scientists, nurses, physicists, engineers, and other healthcare professionals, all contributing to high-quality, patient-centered care.

Linköping

Sweden

Östergötland is a region in southern Sweden, known for its rich history, innovative environment, and high quality of life. The region combines vibrant cities with peaceful countryside, offering a balanced lifestyle with both professional opportunities and a welcoming atmosphere.

Linköping, one of the main cities in the region, is a dynamic and modern university city. It is home to Linköping University and a leading university hospital, making it an important centre for education, research, and healthcare. Living in Linköping offers a high standard of living, a safe environment, and excellent opportunities for both career development and family life.

The region is known for its safe and family-friendly communities, good schools, and high-quality healthcare services. The healthcare system is well-organized, with a strong focus on collaboration, continuous development, and patient-centred care. Medical professionals benefit from a supportive working environment and close cooperation between different specialties.

Nature plays an important role in everyday life in Östergötland. The region is surrounded by forests, lakes, and open landscapes, offering plenty of opportunities for outdoor activities such as hiking, cycling, and swimming. The proximity to nature, combined with clean air and peaceful surroundings, makes it an ideal place for families and for maintaining a healthy work-life balance.

Linköping is also well-connected, with efficient transport links to major Swedish cities such as Stockholm, Gothenburg, and Malmö. Despite its accessibility and growth, the city maintains a calm and manageable pace of life, with short commuting times and easy access to services.

The region has a strong tradition of innovation and collaboration, particularly within technology, healthcare, and research. Cultural life is active, with museums, concerts, theatres, and local events throughout the year, contributing to a lively and engaging community.

Housing in Linköping and the surrounding areas is generally more affordable than in Sweden's largest cities, offering a wide range of options from modern apartments to family homes close to nature. Combined with Sweden's strong social system, this creates a stable and comfortable living environment.

In conclusion, living in Region Östergötland and Linköping means enjoying a high quality of life in a safe, innovative, and well-connected region. With its strong healthcare system, academic environment, and natural surroundings, it is an excellent place for medical professionals seeking both professional growth and a fulfilling personal life.
